universal
login manager

Security. Productivity. Control.

Improve the Security and Efficiency
of your Devices

Designed to optimize your imageRUNNER ADVANCE devices, the Universal Login Manager provides a simple way for users to identify themselves and benefit from a personalized experience at the device. The IT department can also track device usage without any requirement for a server; ideal for smaller businesses.

There are a number of practical challenges that small businesses face:

Security: Do you know how to protect your sensitive documents?

Productivity: Do you know how much time is regularly wasted inputting device settings?

Control: Do you know the unnecessary costs involved?

With the Universal Login manager you can enhance document security, increase employee productivity and stay in control.

Key **Features**

{ Enhance your **Document Security** }

The Universal Login Manager secures your imageRUNNER ADVANCE devices against unauthorized access and usage which protects your information. To gain access to the device, users simply authenticate using their company proximity card or by entering a PIN code on the screen.

{ Increase your **Productivity** }

Once logged in, users can be presented with the Quick Menu providing shortcuts to personal one-touch buttons and workflows. In addition, users can easily and quickly scan documents directly and send them directly to their personal email address or network folder.

{ Gain **Control** }

The Universal Login Manager allows administrators to track device usage on up to 10 devices and a maximum of 5000 jobs in a single consolidated report. The login screen of imageRUNNER ADVANCE devices can be customized to show your company logo ensuring the device blends perfectly with your company culture and image.

4

Immediate **Benefits**

The Universal Login manager provides immediate benefits to the IT administrator, the end user and the business owner.

{ **IT Administrator** Experience }

As a serverless solution, the Universal Login Manager comes with an easy setup and administration. With the combination of its secure login functionality and its flexible proximity card support, administrators can prevent unauthorized access to devices and determine permitted levels of use for different users.

Secure your imageRUNNER ADVANCE devices while reducing IT overheads.

{ **End User** Experience }

The Universal Login Manager provides effortless user login without manual data entry which ensures documents do not get mixed up with colleagues' documents. Personal images can even be uploaded if the image login functionality is selected. Personal convenience and productivity is enhanced with one-touch buttons configured saving valuable time for the end user.

Increase employee productivity through personalization.

{ **Business Owner** Insights }

The integrated cost tracking tool means that costs are easily identified and can be controlled by reducing waste. In addition, business owners profit from increased security with regard to critical information and compliance. Corporate identity can be promoted via a custom built login screen displaying the company logo.

Control costs for more agile business operations.
